

DASSAULT AVIATION

Maintenance Management System For Export Customers

CUSTOMER PROFILE

Dassault Aviation is part of Dassault, a French aerospace company shaping the future by designing and building **military aircraft** (Rafale, Mirage...), **business jets** (Falcon...) and space systems. It has delivered more than 10.000 aircrafts over the 90 past years.

CHALLENGES

Dassault Aviation wants to provide to its export customers a **Maintenance Management System** fully integrated with the Rafale aircraft health and usage monitoring system (**HUMS**), and its technical documentation.

They had the following objectives:

- Continuing **airworthiness management**
- Equipments **configuration control** (Operational Mission Equipment)
- Maintenance **planning** and **execution**
- **Fleet availability** optimization

BENEFITS

- Taking advantage of Aero-Webb[®], a **proven, secured** and **innovative** maintenance management system connected with the Rafale.
- Offer additional **high value services** and ensure optimal aircraft availability to its customers
- The **Rafale export customers** dispose of off-the-shelf connectivity between the **MMS**, the **Rafale** and its **updated technical information**
